### PORTFOLIO DESCRIPTION

If you are looking to achieve optimal capital growth over the long-term and to protect yourself against cost-of-living increases, you should opt for this portfolio, which includes a heavy equity weighting. You should not expect stable income (bond funds comprise just 12% of the portfolio) and you have a medium to high risk profile.

Desjardins Funds are offered by Desjardins Financial Services Firm Inc., a mutual fund dealer owned by Desjardins Group. The Desjardins Funds are not guaranteed, their value fluctuates frequently and their past performance is not indicative of their future returns. The indicated rates of return are the historical annual compounded total returns assuming the investment strategy recommended by the asset allocation service is used and after deduction of fees and charges in respect of the service. The returns are based on the historical annual compounded total returns as at March 31, 2016 of the participating funds, including changes in security value and reinvestment of all distributions, and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any securityholder in respect of a participating fund that would have reduced returns. Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments and the use of an asset allocation service. Please read the simplified prospectus of the Desjardins Funds in which investment may be made under the asset allocation service before investing.
