The Desjardins Emerging Markets Fund is rewarded once again - February 14, 2013

The Desjardins Emerging Markets Fund was awarded the FundGrade A+ rating by the firm Fundata for its excellent performance throughout the year 2012.

Rewarded for the third time, the Desjardins Emerging Markets Fund received two prizes for best three- and five-year performance at the Lipper Awards Gala held last February 5.

Also noteworthy is the fact that the Fund stood out as a finalist at the 18th Morningstar gala held last November.

The Fundgrade A+ rating recognizes not only the investment funds that distinguish themselves by posting the best risk-adjusted returns, but also those that do so while demonstrating the highest level of consistency. The Fundgrade A+ rating means that 98% of the funds in the same category posted lower returns despite experiencing the same risk levels in 2012.

Lipper Awards are given out in 23 countries around the world and honour investment funds that have excelled in delivering strong risk-adjusted performance relative to peers. Lipper's proprietary fund rating methodology is used to determine the winners.
