FUND DESCRIPTION

The Desjardins Canada Multifactor – Controlled Volatility ETF was designed to replicate—to the extent possible—the performance of the Scientific Beta Canada Multifactor – Controlled Volatility Index (the “Index”), net of fees and expenses.

The current investment strategy is to invest in and hold the constituent securities of the Index in the same proportion as they are reflected in the Index or securities intended to replicate the performance of the Index.

BENEFITS

- Selects Canadian securities with an exposure to 6 documented long-term rewarded risk factors.
- Designed with an expected risk lower than the reference index.
- Designed to mitigate losses in market downturns and participate in market recoveries.
