Active strategies designed to support your investment goals

Desjardins is expanding its exchange-traded fund (ETF) lineup with the launch of **three new actively managed ETFs**. This gives you access to an even broader range of low-cost investment solutions, all in one place.

These **new active ETFs** may help **diversify your portfolio's geographic exposure and asset mix**. Used on their own or alongside index funds or index ETFs, they can provide **additional potential sources of value, particularly through active security selection and portfolio positioning**.

Desjardins Active Canadian Bond Universe ETF (DACU)

An actively managed fixed-income solution for investors seeking **stability**. This ETF invests primarily in Canadian government and corporate bonds.

Desjardins Canadian Equity Leaders ETF (DACL)

A concentrated portfolio of **high-quality Canadian companies focused on long-term growth**. The portfolio holds 25 to 40 high-conviction stocks selected through fundamental analysis.

Desjardins Global Opportunities ETF (DAGL)

A solution that provides access to **equity markets around the world**. Through active management, this ETF adjusts its investments across regions, sectors and market opportunities to deliver diversified global exposure within a single portfolio of approximately 275 to 350 securities.

Leveraging the active investment expertise of Desjardins Global Asset Management (DGAM) across equities and fixed income, these ETFs complement index-based solutions. They provide access to targeted market opportunities while making it easier to build and manage a well-diversified portfolio.
