

Ready to invest in a better future for communities and the planet?

What you need to know about Desjardins Sustainable Portfolios

OUR PORTFOLIO SOLUTIONS ARE TURNKEY
INVESTMENTS THAT ARE MANAGED AND OPTIMIZED
BY EXPERTS.

Proper diversification is critical for keeping your investment portfolio on solid footing. With our portfolio solutions, you get to hand this task over to a team of experienced managers who will carefully select and monitor your investments for you. They'll ensure you have the right asset allocation for your investor profile and achieve your goals by diversifying across global regions, industries, market capitalizations and more.

Are your investments scattered here and there?

Desjardins Portfolios are ideal for bringing all your investments together in one place. Consolidating makes it easier to understand your financial situation while minimizing the number of transactions you have to make.

SECURITIES ARE SELECTED BASED ON TWO ANALYSES: FINANCIAL PERFORMANCE AND COMPLIANCE WITH ESG CRITERIA.

Assessing ESG factors enhances the financial analysis. It provides insight into a company's strategy, value and risk exposure, as well as its ability to seize business opportunities and create value over the long term for shareholders, employees, clients and the community. At Desjardins, we believe that when companies are successful in managing ESG risks, they're often better positioned to seize the opportunities presented by a transitioning economy.

DESJARDINS IS A LEADER IN RESPONSIBLE INVESTING IN CANADA.

Desjardins Global Asset Management (DGAM) relies on a team of globally recognized portfolio managers that specialize in responsible investment. DGAM excels by drawing on the expertise of its in-house professionals and some of the most experienced investment portfolio managers in the world.

When you choose Desjardins Sustainable Portfolios, you benefit from Desjardins's 35 years of experience¹ in the responsible investment field.

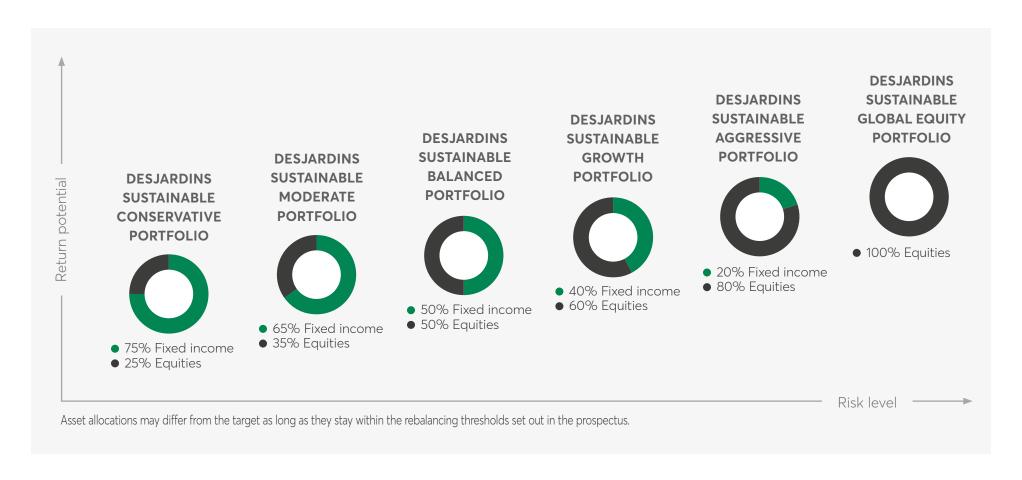

Did you know? All you need to start investing in the stock market is an initial investment of \$500 or automatic contributions of at least \$25.

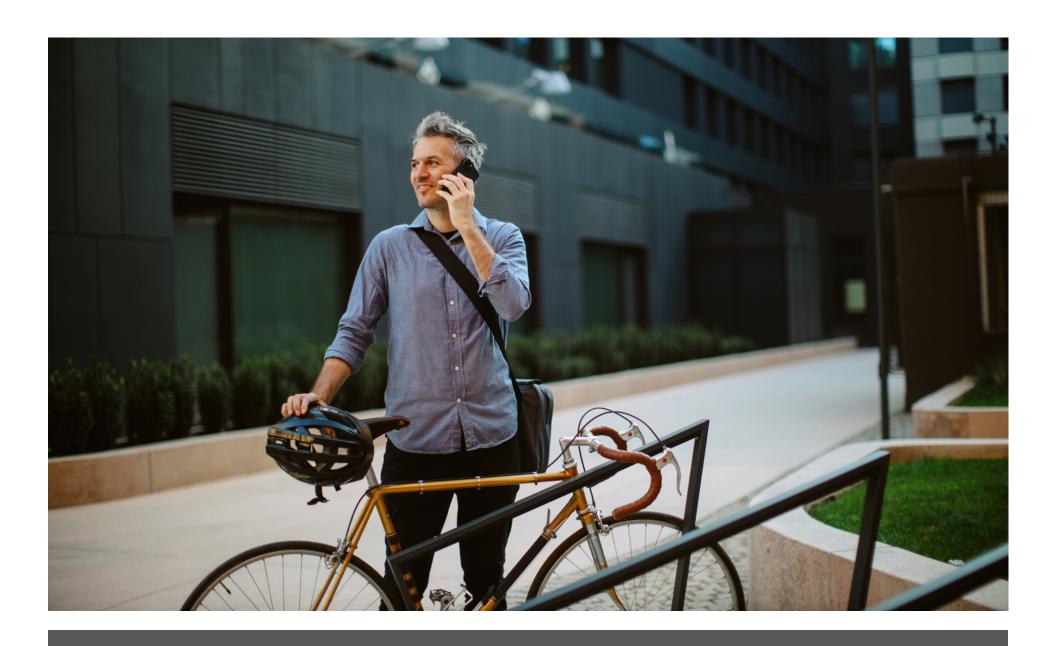

¹ In 1990, Desjardins introduced its first responsible investment fund, the Desjardins Environment Fund, which is now called the Desjardins Sustainable Global Opportunities Fund.

Desjardins Sustainable Portfolios

We offer six different portfolios, each designed to meet different financial goals. You can choose the Desjardins Sustainable Portfolio that suits you best based on your investor profile, personal circumstances and risk tolerance, whether it's low, moderate or high.

These portfolios are made up of Desjardins Sustainable Funds, which take all ESG criteria into account.

WANT TO MAKE A DIFFERENCE THROUGH YOUR INVESTMENTS?

DESJARDINS SUSTAINABLE PORTFOLIOS COULD BE JUST WHAT YOU'RE LOOKING FOR.

What are mutual funds and portfolios?

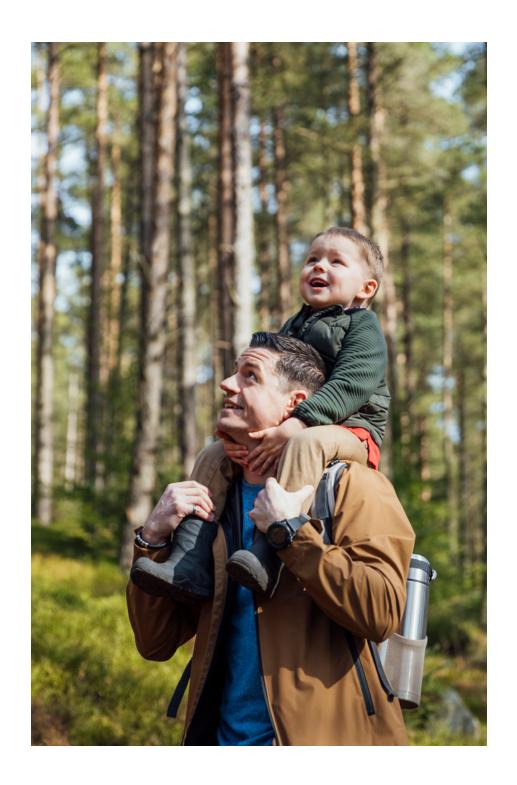

Mutual funds

A "mutual fund" or "investment fund" is an investment product that pools your money with that of other investors. It is then entrusted to a portfolio manager who selects companies or organizations that offer growth potential and meet the fund's objectives. The portfolio manager invests your money in these businesses so it can grow.

Mutual fund portfolios

A portfolio solution is made up of different mutual funds selected to increase the diversification of your investments across global regions, industries and business types. This diversification is meant to increase potential growth while limiting risks.

Each portfolio is designed to suit a specific risk tolerance level. Your advisor will carefully analyze your investor profile to determine which portfolio is right for you.

What are ESG criteria?

ESG criteria are used to determine which companies are selected for Desjardins Sustainable Portfolios and Funds. Reflecting key social and environmental issues, these criteria help us decide where your money gets invested.

Environmental

Example: Climate change

Social

Example: Workplace health and safety

Governance

Example: Diversity on boards of directors

What is responsible investment?

Responsible investment is an approach that exposes investors to attractive return potential while giving them the chance to support companies that are committed to sustainability and social responsibility.

CONTROVERSIAL INDUSTRIES ARE EXCLUDED²

ESG CRITERIA ARE INCLUDED IN THE FINANCIAL ANALYSIS

SPECIFIC ESG OBJECTIVES

Example: Best-of-sector approach or thematic investing

SHAREHOLDER ENGAGEMENT

Example: Dialogue with businesses
