Dialogue that aims to improve ESG practices within companies

The goal of dialogue is to communicate with issuers whose securities are in the portfolio and influence their environmental, social and governance practices. It is an opportunity for investors to share their concerns with a company's executive team and to express their expectations for change that will improve the ESG practices of the targeted companies.

Shareholder proposal

A shareholder proposal involves drawing up a non-restrictive recommendation, i.e., a recommendation that does not prescribe direct action that would hamper company officers. The recommendation is submitted to all company shareholders.

Voting during shareholder meetings to influence ESG practices

By exercising their voting rights, shareholders can take a position on all questions submitted each year at shareholders' meetings.

What is an investment fund?

Also called a **mutual fund**, an investment fund is a financial product in which your assets are pooled with those of other investors. All of the assets are entrusted to a portfolio manager, who invests them in stocks issued by diverse publicly traded companies or bonds, in accordance with the fund's investment policy. The objective is to grow the assets based on the fund's investment objectives.

What are ESG criteria?

Incorporating ESG criteria helps identify the various issues companies may be exposed to. To determine **the best-equipped companies** to resolve these issues, the portfolio manager incorporates the ESG considerations relevant to the companies' sector and their activities into their financial analysis.
